

Project Name:	SARS Covid-19 detection through AI
Team:	Mission Possible
Project description:	<p><b>For</b> users  <b>Who</b> want to know their feedback on covid-19 reports  <b>the</b> let it free  <b>Is</b> a web app  <b>That</b> checks users reports and provides the accurate result.  <b>Unlike</b> if users not able to go hospitals in the covid-19 situation  <b>Our application</b> will help them to submit their reports and they can get their accurate result. Based on their result they can order the medical kit and they can make an appointment to the doctors as well.</p>
Benefits outcomes:	<ol style="list-style-type: none"> <li>1. If the users are able to utilize our program, they will be able to readily get accurate feedback on their covid-19.</li> <li>2. Self-assessment of the user</li> <li>3. Rapid information of the active cases</li> <li>4. Doctor booking appointment</li> <li>5. Minimal chat with the chat bot</li> <li>6. Personal information form linked with firebase so, user can send primary information to doctors</li> </ol>
